

Nordita Visiting PHD STUDENT FELLOWSHIPS

NORDITA

The visiting PhD student program at Nordita is open for applications for visits during the 2012 spring term. The program, **primarily intended for PhD students in the Nordic and Baltic countries**, offers selected students the opportunity to spend time at Nordita and take advantage of the research environment and ongoing scientific activities at the institute and the AlbaNova University Center in Stockholm. This can, in particular, include collaboration on research projects with Nordita academic staff and participation in Nordita Scientific Programs in areas of interest for the students. Visiting PhD fellows may also be interested in taking PhD-level courses offered at Stockholm area universities.

A visiting PhD Fellowship will be awarded for **a period of one to three months**, providing accommodation and a contribution towards travel and living expenses in Stockholm. Priority will be given to applicants who are registered PhD students in theoretical physics or a related subject at a university in the Nordic or Baltic countries at the time of the fellowship visit to Nordita, but students from other countries will also be considered.

Applications for the fellowship program can be submitted at:

jam.nordita.org

Please note that **only on-line applications will be considered**.

Fellowships are awarded twice a year but starting dates at Nordita are flexible. **Applications for spring 2012** should be received by:

15 January 2012

Please direct enquiries about Nordita Visiting PhD Fellowships to the Director of Nordita, professor Lárus Thorlacius (larus@nordita.org).

NORDITA, the Nordic Institute for Theoretical Physics, was founded in Copenhagen in 1957. It moved to the AlbaNova University Center in Stockholm in January 2007, under the auspices of Royal Institute of Technology and Stockholm University. Research at Nordita covers a wide range of modern theoretical physics including *astrophysics, biological physics, condensed matter physics, gravitation and cosmology, statistical physics/complex systems, and subatomic physics*. Details about scientific activities at Nordita can be found at **www.nordita.org**.
